LETTER OF RECOMMENDATION

Date: 30th May 2025

Dear Members of the Admissions Committee,

I am pleased to recommend Ms. Aanchala Bhongade. As Professor and Head of the Production Engineering Department at Veermata Jijabai Technological Institute (VJTI), I have mentored Aanchala since her third semester in 2022, witnessing her exceptional growth as a student and researcher. Her academic excellence and dedication make her an outstanding candidate for your program.

Aanchala consistently demonstrated commitment to academic excellence. In her third year, she led a Machining and Process Engineering lab project on sand casting, collaborating effectively with her team to produce a high-quality gear blank with minimal defects, showcasing her problem-solving skills and analytical rigor. Her intellectual curiosity drove her to pursue online courses in data science, equipping her with skills she applied in the Business Analytics course I recommended, where she excelled in statistical modeling and analysis using Python, a foundation critical for data-intensive science.

Her final year project presentation, based on her University of Cambridge internship, the most prestigious research opportunity secured by any student at VJTI, was a highlight of her growth. Aanchala analyzed climate data to highlight the unequal impact of heatwaves in India, presenting her findings with clarity. As her mentor, I was impressed by her resilience in navigating the challenges of securing and succeeding in such competitive internships, a quality that underscores her readiness for Cambridge's rigorous academic demands.

She also interned at the University of Zurich, further honing her data-intensive research skills. Her adaptability in transitioning from Production Engineering to data science, makes her uniquely suited for the program's interdisciplinary approach. I am confident Aanchala will excel under the guidance of your faculty, contributing meaningfully to your academic community through her dedication and innovative spirit.
